FOR IMMEDIATE RELEASE

### **The Desire For Good Health and Hygiene Make**

#### **Spaloo a Hot Commodity**

**(Chicago, IL)** – Spaloo, a bidet seat that replaces a standard toilet seat on practically any toilet, offers “hands free cleaning” with a gentle spray of warm water. Hands free means paper free, germ free and more comfortable. For most Americans, that equates to a sound decision, both for the environmentally conscious and the health-conscious. Originally designed by American engineers for the healthcare industry in the 1950s, the product was quickly imported to Japan, where its health benefits were adopted by the general public. A 2000 study indicates the number of Spaloo-type seats in Japanese homes outweighs the number of personal computers.

The Spaloo bidet seat is safe, clean and easy to use; no wonder it’s Japan’s best kept secret (). Spaloo is easy to install, as it taps into an existing water line and plugs into a standard GFCI plug. With the touch of a finger on the control panel, the Spaloo’s seat temperature can be adjusted (Mom will find the warmed

seat the most inviting feature in colder months), the water pressure can be increased or lessened, the water temperature can be set to warm – warmer – warmest; even a

**-cont'd-**

blow drier can be activated to assure no irritation. (Just as 50% of the U.S. population suffers from hemorrhoids, so might women who have experienced childbirth. The gentle water spray and blow drier offer the most comfortable feeling of clean.) Truly Spaloo offers the most innovative and sanitary toileting experience of most Moms' (*indeed ALL women's*) lives.

In an era when Mom barely finds a minute to herself, and in an age when good health, cleanliness and longevity are at a premium, isn't Mom primed for a Spaloo? This is one gift that will really mean something every day, for a long time to come.

The Spaloo retails for \$399, and it is available online at [www.Spaloo.com](http://www.Spaloo.com) or by calling 1-888-Spaloo2.
